

COLD CATHODE FLUORESCENT FLAT LAMP

ABSTRACT OF THE DISCLOSURE

A cold cathode fluorescent flat lamp is disclosed. The cold cathode
5 fluorescent flat lamp includes an enclosure chamber sealed by two
reciprocally parallel plates of glass and containing a gas therein, an
anode and a cathode disposed in the enclosure chamber, wherein the
cathode is parallel to the anode, an auxiliary anode disposed between the
anode and the cathode and being parallel to the cathode, wherein the
10 auxiliary anode is attached to a surface of either plates of glass, and a
printed circuit board for providing a voltage for the anode and the
cathode.
